Saad Abdur Razzaq

Faisalabad, Pakistan | DOB: 05 Oct, 2002 | Passport: FU1072703 | (+92) 303-6668942
saadabdurrazzaq00@gmail.com | linkedin.com/in/saadarazzaq | github.com/saadarazzaq

Summary

Software Engineer specializing in AI/ML, experienced in designing, developing, and deploying production software systems across backend, full stack, and intelligent applications. Skilled in Python, APIs, databases, AI and containerized environments, with hands-on experience in building end-to-end software solutions.

Education

National University of Computer and Emerging Sciences (NUCES–FAST) *Sep 2020 – Jun 2024*
B.Sc. Computer Science Chiniot-Faisalabad, Pakistan

- Relevant coursework: Data Structures, Artificial Intelligence, Numerical Computing, Software Engineering, Probability and Statistics, Applied Machine Learning, Fundamentals of Computer Vision

Pakistan International School *Aug 2018 – Jun 2020*
Higher Secondary School Certificate (HSSC) Al-Khobar, Saudi Arabia

Work Experience

Software Developer *Jun 2025 – Present*
ProActive Enterprises (Private) Limited Karachi, Pakistan

- Design, develop, implement, and maintain software applications supporting business operations and evolving technical requirements.
- Contribute to software architecture, application development, database management, API integrations, and deployment workflows across the software development lifecycle.
- Optimize existing applications and software systems through maintenance, enhancements, troubleshooting, and continuous improvements in functionality and performance.
- Implement new technical requirements and application enhancements while maintaining the reliability and usability of existing software solutions.
- Collaborate on ongoing software development projects, adapting solutions to operational requirements and evolving business needs.

Assistant Full Stack Developer *Jan 2025 – Jun 2025*
ProActive Enterprises (Private) Limited Karachi, Pakistan

- Contributed to frontend and backend application development, including user interfaces, server-side functionality, and API integrations for internal business applications.
- Assisted in designing and developing database structures, data models, and application integrations supporting company operations.
- Performed debugging, testing, troubleshooting, and application optimization to improve software functionality and performance.
- Collaborated with developers on feature implementation, code reviews, Git-based version control, and technical documentation.
- Supported the development and improvement of software solutions for operational activities across multiple business functions.

Backend Intern *Jul 2024 – Jan 2025*
ProActive Enterprises (Private) Limited Karachi, Pakistan

- Assisted in developing and maintaining backend APIs and server-side functionality for internal business applications.

- Worked with databases, data models, and queries supporting customer, equipment, product, and operational records.
- Supported debugging, testing, troubleshooting, and maintenance of existing backend functionality and application components.
- Used Git for version control and participated in code reviews, technical documentation, and collaborative development activities.

Teaching Assistant – Data Science & Business Analytics *Aug 2023 – Jun 2024*
NUCES–FAST, CFD Campus Chiniot-Faisalabad, Pakistan

- Supported course delivery across three core subjects, designing assignments, quizzes, and lab exercises aligned with learning outcomes and assessment standards.
- Assisted students in applying Python for data analysis, visualization, machine learning, and predictive modeling.
- Guided learners in software refactoring, code quality improvement, and maintainability through code review sessions using Git and SonarQube.

Portfolio Projects

- **ClassMind** – Distributed classroom intelligence system integrating multimodal data (audio, text, sentiment, engagement) to autonomously evaluate participation and concept grasp, with real-time instructor insights. *(GPT-4, Whisper, BERT, LangGraph, TensorFlow, FastAPI, WebRTC)*
- **EffiScribe** – AI-powered ambient clinical scribe that records patient–doctor conversations and generates structured SOAP notes via automated speech recognition and language modeling. *(OpenAI Whisper, NLP, React Native, Next.js, FastAPI)*
- **AutoGrade** – Automated MCQ grading system for large-scale evaluation, reducing manual effort. *(Python, OpenCV, OCR/OMR, FastAPI)*
- **Notive AI** – Cross-platform, privacy-first voice note-taking app with on-device ASR for multilingual transcription. *(Whisper AI, TensorFlow, LiveKit, React Native)*

Certifications

- IBM – *AI Developer* Professional Certificate (10 courses), 2025
- Google – *Advanced Data Analytics* Professional Certificate (8 courses), 2025
- IBM – *Data Science* Professional Certificate (12 courses), 2025
- IBM – *Generative AI Engineering* Professional Certificate (16 courses), 2025
- IBM – *Data Engineering* Professional Certificate (16 courses), 2025
- IBM – *AI Product Manager* Professional Certificate, 2025
- University of Pennsylvania – *AI For Business* Specialization, 2025
- ZTM Academy – *TensorFlow for Deep Learning* Bootcamp (63 hrs), 2025

Technical Skills

- **Languages:** Python, C, C++, C#, MATLAB, R **Web/API:** FastAPI, React, Node.js, Express.js
- **Databases:** PostgreSQL, MySQL, MongoDB **AI/ML:** TensorFlow, PyTorch, Keras, Scikit-learn, OpenCV
- **Data/DevOps:** Pandas, NumPy, SciPy, Streamlit, Matplotlib, Docker, Google Cloud, Linux, Jenkins, Gerrit, Helm, Ansible

Languages

Urdu – Native | **English** – C1 (IELTS Academic: 7.0 overall, no band below 6.5)
